About the organisation

MSF was founded in 1971 by a small group of doctors and journalists who believed that all people have the right to medical care regardless of race, religion, creed or political affiliation. The 13 founders have grown to over 36,000 staff on the frontline of emergency medical aid across 70 countries.

MSF is an international, independent, medical humanitarian organisation, delivering emergency aid to people affected by armed conflict, epidemics, healthcare exclusion and natural or man-made disasters.

The German section was founded in 1993. The main areas of work are project implementation, recruitment, media and public relations as well as fundraising.
